Lighting Solutions for Educational Facilities.

Cooper Lighting offers a wide range of energy-efficient products to meet the needs of today's schools.

Lighting represents up to 40% of an educational facility's utility cost. With the increasing cost of electricity, designing buildings with the most energy-efficient lighting is essential. Cooper Lighting can provide a wide array of energy-efficient fixtures for all areas of the facility that will minimize energy consumption while maximizing light output.

Visit www.cooperenergysolutions.com or email talktous@cooperindustries.com to receive a copy of the Total Lighting Solutions for Schools and Educational Facilities brochure.
