

THE SMARTEST WIRING SOLUTION? NO WIRES.

No wires at all. Our revolutionary wireless occupancy sensors need no wires and no batteries. And that means no problems for you. Simply replace the existing wall switch, mount the occupancy sensor and the installation is complete. You'll save up to 50% in overall installation costs with the first completely self-powered wireless sensor in the industry. It's perfect for retrofit applications since no additional wiring is needed. To learn more about the intelligent way to save energy and boost profits, visit LEVITON.COM/wirelessOS. It's the smart thing to do.
